

## Week 8: Coding Assignment

**URL to GitHub Repository:** [Rcruzn33/CSS-coding-to-webpage: Coding CSS to my HTML webpage \(github.com\)](https://github.com/Rcruzn33/CSS-coding-to-webpage)

**URL to Your Coding Assignment Video:** <https://youtu.be/dDLOqOH6Sm8>

### Instructions:

- In Visual Studio Code, write the code that accomplishes the objectives listed below and ensures that the code compiles and runs as directed.
- Create a new repository on GitHub for this week's assignments and push this document, with your project code, to the repository.
- Include the URLs for this week's repository and video where instructed.
- Submit this document as a .PDF file in the LMS.

### Coding Steps:

- Style the website you made last week using **CSS** with the following requirements:
  - Use only external CSS file (no internal or inline styling)
  - Every element must be styled.
  - Create style rules using **class**, **id**, and **element** selectors.

### Video Steps:

- Create a video, up to five minutes max, showing and explaining how your project works with an emphasis on the portions you contributed.
- This video should be done using screen share and voice over.
- This can easily be done using Zoom, although you don't have to use Zoom, it's just what we recommend.
  - You can create a new meeting, start screen sharing, and start recording.
  - This will create a video recording on your computer.
- This should then be uploaded to a publicly accessible site, such as YouTube.
  - Ensure the link you share is **PUBLIC** or **UNLISTED**!
  - If it is not accessible by your grader, your project will be graded based on what they can access.
